March 19, 1998

TO: Rick Dawson, Benton-Franklin Health District
Anne Duffy, Washington State Department of Health
Beverly Gaines, United States Environmental Protection Agency

FROM: Guy J. Gregory, Washington Department of Ecology

SUBJECT: TRANSMITTAL OF DOCUMENTS, PASCO SANITARY LANDFILL

Enclosed with this memorandum are volumes relevant to Pasco Sanitary Landfill. The binders contain Remedial Investigation information. The document integrates all Remedial Investigation information gathered under Order DE94TC-E103 and Amendment No. 1 to that order into a single set of volumes. The document has been reviewed by Ecology.

Additionally, there is a small document containing construction documentation and initial performance results for interim remedial measures taken under Amendment No. 1 to the Order. Included are performance analyses and as-built diagrams for the NoVOCs™ ground water treatment system, the soil vapor extraction system, and as-builts only for the city water hookups completed December 1997.

Rick and Anne also receive copies of the annual monitoring report for 1997. It has been difficult to coordinate supplying these data in the past, however I hope now that a format has been agreed, fewer problems will be noted in the flow of data.

Copies of all documents are being forwarded to the information repository in Pasco. Public notice on the availability of these documents, including a fact sheet mailed to our mailing list, will be conducted in the very near future. The formal comment period for this study will be conducted following receipt of the last two major documents due prior to remedy selection. These include the Cleanup Level Development Document and the Feasibility Study. Once these documents pass Ecology review, they will be forwarded to you and public notice and outreach activities will commence to solicit agency and public input. I anticipate formal notice no earlier than this autumn.

Of course, input on these documents is welcome at any time. If you have questions, please contact me at (509) 456-6387, or via email at ggre461@ccy.wa.gov.
